

DEEPA N

Full-Stack Developer

Erode, Tamil Nadu | +91 9345368362 | deepanataraj8221@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Fresher with strong knowledge of HTML, CSS, JavaScript, React, and responsive web design. Experienced in building user-friendly and mobile-responsive web applications. Familiar with Git, GitHub, and modern frontend development practices. Passionate about creating efficient UI and improving user experience — looking to learn, contribute, and improve every day.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design

Backend Development: Python, Django Framework, REST APIs, MySQL, SQLite

Tools & Platforms: Git, GitHub, VS Code, Selenium

Soft Skills: Problem Solving, Team Collaboration, Application Design

WORK EXPERIENCE

Python Full Stack Developer Intern

Aug 2025

Gateway Software Solutions, Coimbatore

- Designed and developed web applications using Python and Django, following SDLC and MVC architecture best practices.
- Built and configured frontend interfaces using HTML, CSS, and JavaScript, acting as primary point of contact for UI implementation.
- Developed backend logic including database schema design, query optimization, and session management using MySQL.
- Collaborated with senior developers to gather requirements, translate into technical specs, and deliver features on schedule.
- Conducted unit testing and debugging to ensure consistent performance across browsers and devices.

PROJECTS

Shield: The Veilguard Framework for AI-Powered, Offline Women Safety

Android Studio, CNN, NLP, Java, Kotlin | IEEE Published

- Built an offline Android app using CNN and NLP to detect voice triggers and activate SOS alerts in under 2 seconds.
- Architected application modules including real-time voice processing, alert dispatch, and GPS integration as primary developer.
- Published in IEEE Xplore and presented at IEEE Silicon Conference, NIT Nagaland.

Adaptive E-Commerce Platform for Book Retailing

HTML, CSS, JavaScript, Django, Python, SQLite

- Designed and built a full-stack responsive e-commerce platform with search, browse, cart, and checkout modules.
- Configured product filtering, user authentication, and session management using Django ORM and SQLite.
- Delivered a mobile-responsive UI using CSS Flexbox/Grid, improving cross-device compatibility.
